Executive Summary

- Detail-oriented Data Analyst with hands-on expertise in SQL, Power BI, and Python, specializing in dashboard development, ETL automation, and KPI reporting across finance, marketing, and production functions.
- Delivered 98% data accuracy and reduced query retrieval time by 25% while managing structured reporting systems across 100,000+ row datasets.
- Currently expanding into Generative AI as a GenAI Intern, applying prompt engineering and agentic workflow design to real-world AI use cases. Brings a strong analytical foundation combined with emerging LLM-driven automation skills to deliver scalable, insight-rich solutions.

Skills

- **Analysis & BI:** Power BI, Data Modeling, DAX (Calculated Columns, Measures, Power Query, Visualization, Filters, Slicers)
- **Databases:** MySQL (Aggregate Functions, Constraints, DDL, DML, DQL, Views, Normalization, CTE, Joins, Sub-queries)
- **Data Handling:** Advanced Excel (VLOOKUP, HLOOKUP, XLOOKUP, INDEX-MATCH, Pivot Tables, Conditional Formatting, Monitoring)
- **Programming:** Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn)
- **Generative AI:** Prompt Engineering, LLM-based Workflow Design, AI-Driven Prototyping, Agentic Workflow Fundamentals

Experience

Generative AI Intern

Aug 2026 - Present

ZlientAI (A Division of TT International)

- Researching, developing, and experimenting with Generative AI models, prompt engineering, and agentic workflows.
- Assisting in building, evaluating, and testing AI-driven prototypes and features.
- Collaborating with the engineering team to integrate AI models into company applications.
- Maintaining technical documentation and reporting progress on assigned research tasks and project modules.

Data Analyst

Jan 2026 - Jul 2026

Avon Global Solution Pvt Ltd

- Delivered structured MIS reporting across marketing, finance, and production domains, maintaining 98% data accuracy and 100% on-time report delivery across daily, weekly, and monthly cycles.
- Built and managed SQL Server queries with optimized indexing, reducing data retrieval time by 25% while processing 100,000+ row datasets.
- Designed interactive Power BI dashboards using DAX measures to track business KPIs, enabling faster, data-driven decision-making for stakeholders.
- Conducted root-cause analysis and anomaly detection using Power Query and Advanced Excel, improving operational efficiency by 15–20%.
- Owned end-to-end ETL processes, data cleaning, validation, and structuring — to ensure error-free, scalable reporting systems.

Projects

AI-Based Chrome Extension for Phishing URL Detection

- Tools used: HTML, CSS, JavaScript, Gemini AI API, JSON
- Built a browser extension combining heuristic pattern scanning (TLDs, keywords, IPs) with Gemini AI-based scoring, achieving 95% phishing detection accuracy and sub-2-second response time.
- Designed a multi-layered detection system using a local JSON blacklist alongside AI analysis, reducing false positives by 20% and improving overall reliability..
- Developed a real-time user interface with voice alerts, dynamic risk scoring, and JSON export, enhancing usability and user awareness of phishing threats.

Food Nutrition Analysis

- Tools used: Power BI, Pandas, Scikit-learn, Power BI
- Trained a machine learning classification model on 1,000+ food items, improving nutrition prediction precision by 30%.
- Cleaned and structured large-scale nutrition datasets to ensure reliable model training and visualization output.
- Built Power BI dashboards to track calorie consumption and generate personalized diet recommendations for end users.

Education

Master of Computer Application - Chennai

2023-2025

- B. S. Abdul Rahman Crescent Institute of Science and Technology.

Bachelor of Computer Application - Trichy

2019-2022

- Jamal Mohamed College

Additional Information

Languages: English, Tamil, Malayalam

Activities: Badminton, Football, Gardening, Learning new skills
