EXECUTIVE SUMMARY

Data Analysis with 6 Month of experience leveraging SQL, Excel, and Power BI for data extraction, cleaning, and visualization. Skilled in Power Query and DAX to transform raw data into actionable insights and build interactive dashboards that support data-driven business decisions. Proven track record delivering accurate daily reports and fortnightly dashboards to management, directly improving operational efficiency and reducing reporting errors across marketing, finance, and production domains.

EXPERIENCE

Data Analysis <i>Avon Global Solutions Private Limited</i>	Oct 2025 – Present Chennai, India
- Applied data analysis across marketing, finance, and production domains to support strategic data-driven decision-making. Improved operational efficiency by 15–20% through delivery of actionable analytical insights to stakeholders. - Analyzed and transformed 100,000+ records into process optimization insights using structured data pipelines. - Extracted and optimized structured datasets using SQL Server; reduced data retrieval time by 25% through efficient query writing and indexing. - Automated data cleaning and transformation using Excel Power Query, decreasing manual effort by 30% and improving reporting accuracy. - Designed and maintained interactive Power BI dashboards with DAX measures for real-time KPI monitoring and business reporting. Developed product segmentation and shipment tracking reports in Excel with data validation checks, reducing reporting errors by 20%.	

FREELACE PROJECTS

AI-Based Chrome Extension for Phishing URL Detection Tools: HTML, CSS, JavaScript, Gemini AI API, JSON	Feb 2025 - Apr 2025
- Developed a Chrome extension (Cyber Shield) using HTML, CSS, and JavaScript with heuristic analysis and Gemini AI API, achieving 95% accuracy in phishing detection and response time under 2 seconds. - Designed a multi-layered system with local JSON URL blacklist, pattern scanning (TLDs, keywords, IPs), and AI scoring, reducing false positives by 20% and boosting reliability. - Built a user-friendly real-time UI with voice notifications, JSON export, and dynamic risk scoring, improving usability and awareness for users.	
Food Nutrition Analysis Tools: Python, Pandas, Scikit-learn, Power BI, CSV	Sep 2025 - Oct 2025
- Established a machine learning model to categorize more than 1,000 foods, improving the precision of nutrition prediction by 30%. - Initiated Power BI dashboards to monitor calorie consumption and provide customized diet suggestions for clarity. - Prepared and cleaned big nutrition datasets for successful training and visualization.	

EDUCATION

Master of Computer Application (MCA), CGPA: 6.3 <i>B. S. Abdul Rahman Crescent Institute of Science and Technology</i>	2023 - 2025 Chennai, India
Bachelor of Computer Application (BCA), CGPA: 7.5 <i>Jamal Mohamed College</i>	2019 - 2022 Tiruchirappalli, India

TECHNICAL SKILLS

Programming Languages	: Python, SQL, HTML, CSS
Frameworks	: Pandas, NumPy, Matplotlib, Scikit-learn (Basic ML)
Tools	: Power BI, Excel, Visual Studio Code, Git/GitHub, MS Office, Jupyter Notebook
Data Processes	: Data Cleaning, ETL, Data Validation, Process Optimization
Languages	: Tamil (Native), English (Proficient)
